Flosum's Release Management Solution For Veeva Vault

Accelerating release velocity and improving release quality.

Flosum, a leader in DevOps, and Veeva product partner offers a fully supported, integrated DevOps tool used for more mature development operations. Flosum helps your accounts streamline deployments, enables parallel development, and introduces governance throughout the entire SDLC process. Now you can seamlessly orchestrate deployments across the entire development environment.

Capabilities & Key Features

Technical Specifications

Veeva Vault Extensibility

Full support for Veeva component types such as MDL components, including support for the Flosum Veeva Dependency Identifier, which identifies Veeva dependencies at the branch level.

Powerful, Flexible Security

Enforce governance standards and separation of duties with Flosum pre-built roles and org permissions. Flosum is extensible and customizable to meet your needs, for access and authentication governance.

Dynamic Pipelines

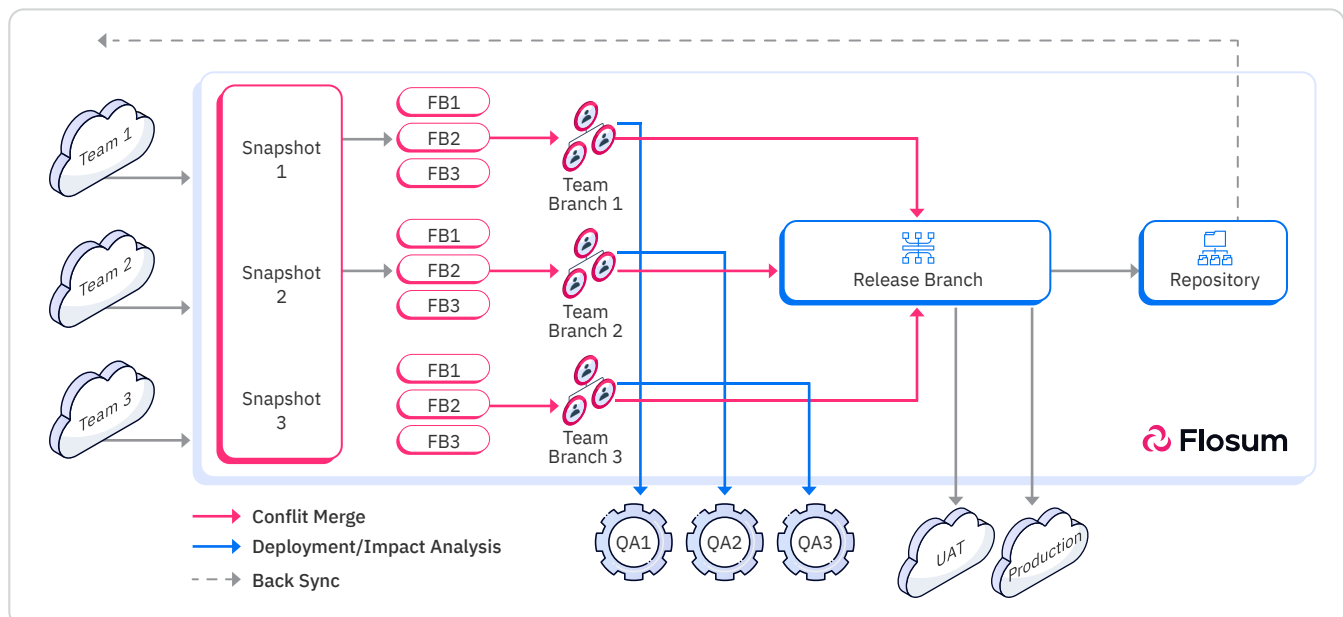

Flosum native pipelines are easily configurable, reusable, and can automate deployment steps and quality gates.

Intelligent Conflict Resolution

Flosum has designed component-specific logic and UI for conflict identification and resolution. Semantic comparison outperforms line-by-line comparison of others tools, minimizing conflicts and reducing merge efforts.

Reporting and Analytics

Flosum is built on Salesforce, therefore customers can use Flosum's reports, dashboards, and KPI tracking.

Branch Management

Flosum shows you up- and down-stream changes with visual indication of branches and orgs out of sync.

Enterprise-Ready, Easy-to-Use

Flosum is trusted by some of Salesforce's largest and most sophisticated customers as well as organizations taking their first steps toward mature DevOps for Salesforce.

DevOps Intelligence

Flosum allows you to measure the value of DevOps in meaningful terms - product quality, delivery velocity and developer productivity. You can truly measure the impact and ROI of your DevOps team.

Proven ROI

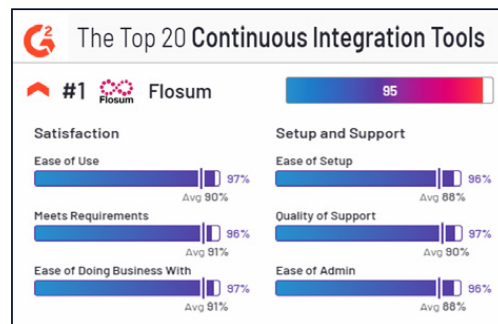

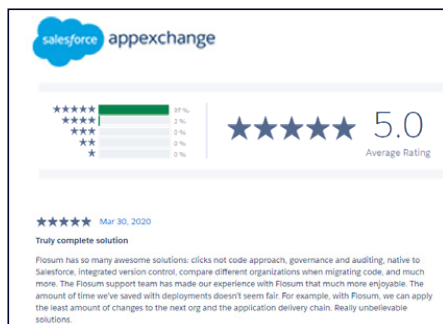

Flosum customers have benchmarked our solutions and report that development team productivity savings achieve payback in under 90 days, along with improved release velocity and quality.

Flosum Solutions

DevOps & Release Management

100% native Salesforce app seamlessly orchestrates changes across your development ecosystem
